Instructions:

1. Decorate your paper with the stickers and whatever craft supplies you have at home.
2. Roll the paper into a cylinder shape tube and staple the tube together.
3. Cut the ribbon into various lengths, saving about 6 inches for later.
4. Staple the ribbon to the bottom of tube. *If you have a hole punch at home, you can punch holes and tie the ribbon to the bottom instead of stapling.
5. Take the 6-inch ribbon and staple each end to the top of the tube. This is how it will hang. *If you have a hole punch, punch 2 holes at the top of your wind sock and tie each end to the holes at the top instead of stapling.
6. Hang your wind sock outside and watch the ribbons dance in the breeze.
